

Make the Switch | Checklist

Welcome! We're thrilled you've chosen First State Community Bank. To help make the switch hassle-free, we've put together a handy checklist just for you!

Take Inventory. Gather a list of all automatic outgoing payments and incoming deposits from your previous bank.

Transition your list of payments and deposits by notifying the companies of your recent switch. Be sure to have your new account number and routing number at hand. *Example:* The electric company will need your new bank information if you previously paid your electric bill through an automatic transfer.

Maintain. Each company notified may have a different time line on when they are able to successfully make the switch to your new account. Keep your previous bank account open until all automatic payments and deposits have been transferred.

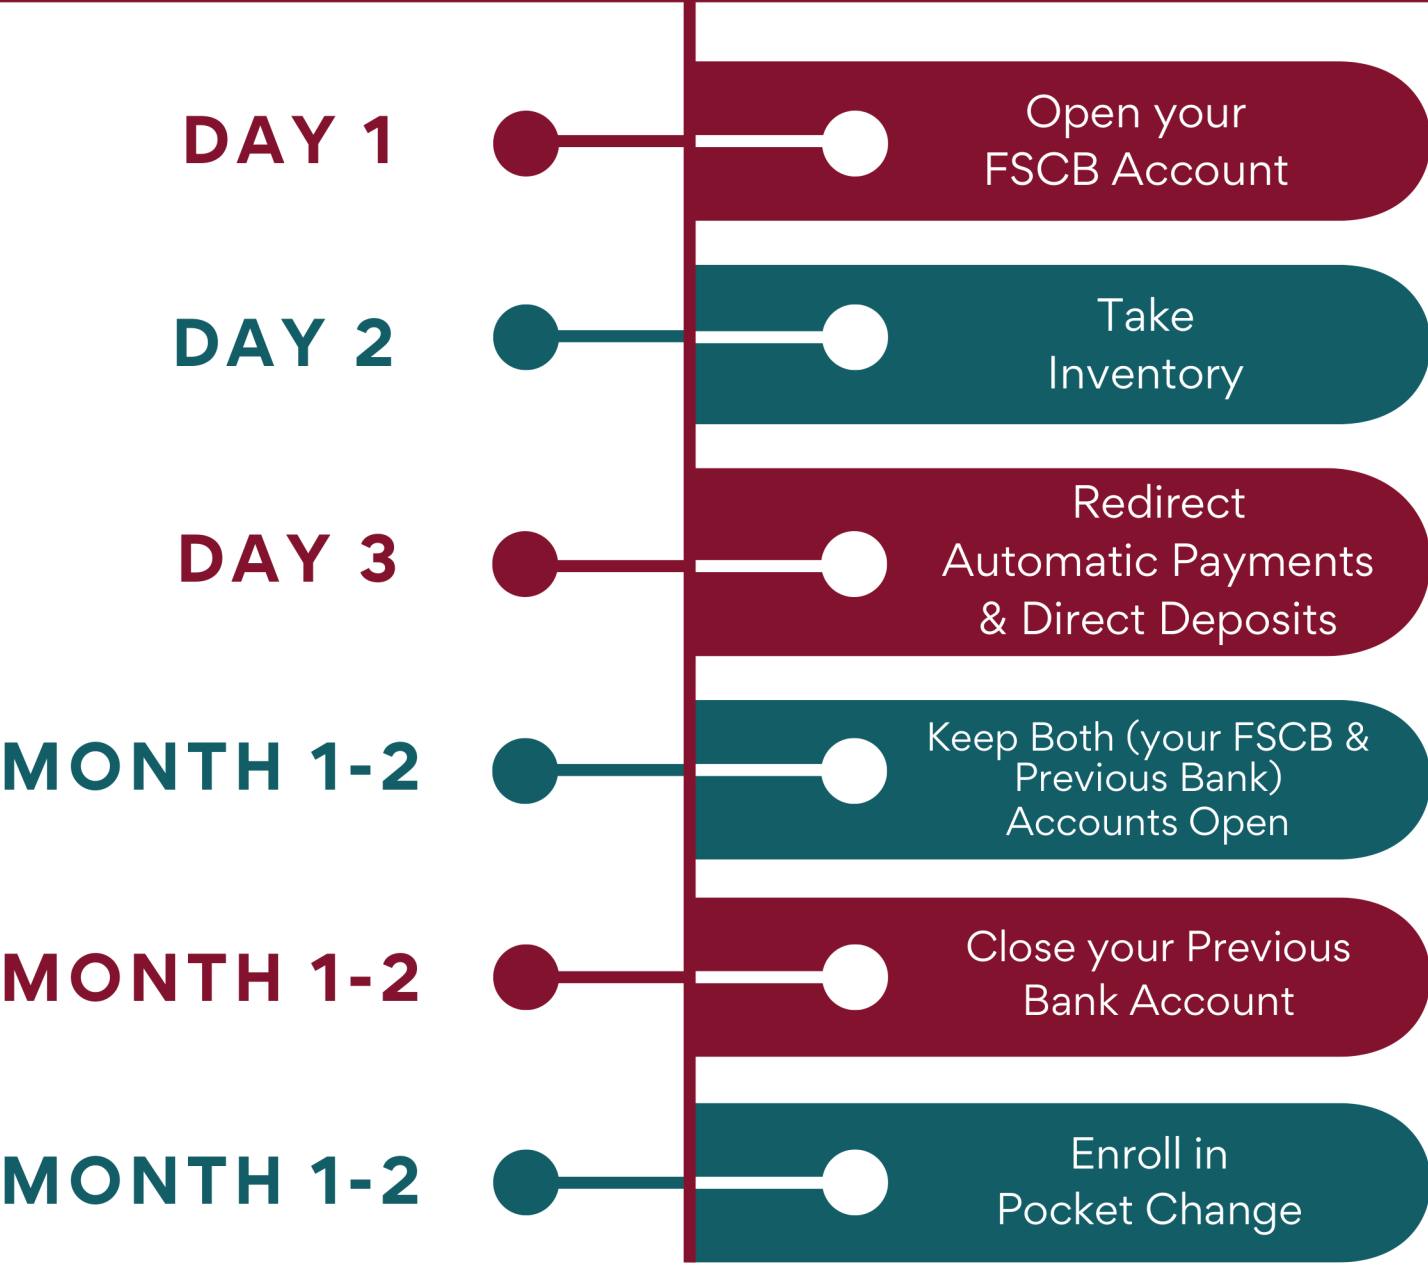

Successfully Switched! Once all automatic payments and deposits have made their way to your new FSCB account, you're in the clear to close your previous bank account.

Enroll in Pocket Change. Did you open a savings account? If not, open an account to start saving money! Pocket Change automatically transfers spare change from each debit card transaction from your checking account to your savings account.
